A FAMILY TRADITION OF QUALITY AND VALUE

It's been well over 100 years since a Norwegian mechanical engineer named Edwin Ruud came to America and developed the first successful automatic water heater. But being the first wasn't enough. From the very beginning, we concentrated on building a reputation for quality and reliability. Then, in the 1950's, we expanded our product line and went into the heating and air conditioning field. Today, the Ruud Air Conditioning Division is one of the world's largest manufacturers of quality heating and cooling products.

As proud as we are of our heritage, we've never rested on it. We realized long ago that our reputation wasn't something we were given. It was something we had to earn—and earn constantly. Today, computers, electronics, and sophisticated equipment have become the “tools of our trade.” But people—not machines—make and keep promises. And our customers have always known they could rely on us to deliver what we promise. That commitment has never changed and it never will.

A FLEXIBLE LINE OF SUPERIOR FURNACES

- Upflow and downflow models accommodate almost any installation requirement.
- Downflow models easily field convertible to either horizontal right or horizontal left configuration.
- Heating capacities from 58,000 to 154,000 BTU/HR.
- A.F.U.E. efficiency ratings above 80%.
- Compact design, from 46"-49" tall, 21"-28" wide, and always 28 ¼" deep.

FEATURES OFFERING VALUE AND RELIABILITY

- Reliable operation that is so quiet, you hardly know it's running.
- A special design that distributes heating comfort evenly throughout your home.
- A durable, stainless steel primary heat exchanger that carries a limited lifetime warranty.

RUUD[®]

SHOPPING FOR EFFICIENCY

Furnaces that are five to 10 years old and older may have an Annual Fuel Utilization Efficiency rating (A.F.U.E.) of 65% or less. That means they only generate about 65¢ worth of heat for every dollar's worth of fuel.

Since 1992, a federal regulation has required that all furnaces, including the Ruud Achiever Premium Class Oil Furnace, provide an A.F.U.E. of at least 80%. The economic benefits of these higher efficient models over older furnaces are obvious.

LIMITED WARRANTY INFORMATION

The Ruud Achiever Premium Class Oil Furnace was developed with reliability and durability in mind. The primary and secondary heat exchanger carries a limited lifetime warranty. The oil burner carries a three-year limited warranty. All other parts have a limited warranty of five years.

EXTEND YOUR COVERAGE WITH A PROTECTION PLUS™ SERVICE CONTRACT

While your Ruud oil furnace is covered by an outstanding limited warranty, you can extend that warranty coverage up to

10 full years with Protection Plus™ extended service protection. Then you can relax and enjoy the comfort of your Ruud furnace - without worrying about the cost of parts or labor for unexpected repairs. And when Protection Plus is purchased in conjunction with your dealer's maintenance program, you can enjoy the peace of mind that your equipment will be both maintained and repaired - as needed and without additional expense.

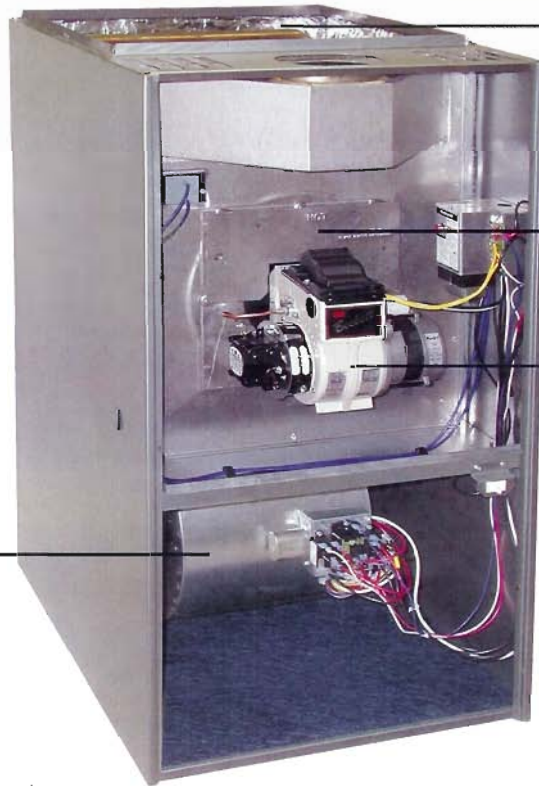

There are a variety of Protection Plus plans to choose from. Ask your dealer about them. For all other non-pricing information please call 1-877-276-4294 or visit their web site at www.protectionplusonline.com.

CONSUMER FINANCING PLANS TO FIT EVERY BUDGET

Participating Ruud dealers provide very attractive financing plans that can make your new heating system even more affordable. Just ask your Ruud dealer for all the details.
